

Interim Report

January-March

2016

” After the implementation of the huge restructuring plan in the Bong Group the service level towards our customers has now been restored. Given the refinancing of the company, where we decreased our debt with approximately 500 MSEK, we see interesting opportunities to strengthen our market position on the envelope market and also to grow in certain segments within light packaging. The turnaround is already seen in the figures and our goal to make profit on bottom line for 2016 is still valid , says Bong’s CEO Stéphane Hamelin. ”

This is the Bong Group

Bong is one of the leading providers of specialty packaging and envelope products in Europe and offers solutions for distribution and packaging of information, advertising materials and lightweight goods. Important growth areas in the Group are packaging within retail and e-commerce and the envelope market within Eastern Europe. The Group has annual sales of approximately SEK 2.3 billion and about 1,600 employees in 16 countries.

Bong has strong market positions in most of the important markets in Europe and the Group sees interesting possibilities for continued expansion and development. Bong is a public limited company and its shares are listed on Nasdaq Stockholm (Small Cap).

Market and industry

During the first quarter of 2016, the European envelope market volume decreased by approximately 4% compared to the same period previous year according to FEPE statistics. Bongs belief is that the FEPE statistics are underestimating the market decline because German envelope manufacturers are overrepresented in FEPE, and Germany had a strong activity during Q1 2016 compared to 2015. Bongs statistics shows an 8% decline in all of Western Europe. According to FEPE the south eastern European countries are more stable and do not show the same level of decline.

Bongs assessment is that the decline in the market will continue in the same pace during 2016. Since the raw material prices are increased, due to decreased capacity, it has been necessary for Bong to increase sales prices to the market. Competitors on the European market have also increased prices in order to cope with the raw material increases.

The restructuring process and consolidation of the industry will continue, but at a slower pace than the market decline. Large overcapacity will remain.

The direct marketing segment, representing about one third of Bong sales, shows a strong recovery. The transactional segment, also representing about one third of Bong sales, still decreases due to the digitalisation. The light packaging market, where Bong is present, is still growing and is a large and fragmented market.

Sales and profit

January – March 2016

Consolidated sales for the first quarter reached SEK 567 million (639). Exchange rate fluctuations had a negative impact on sales of SEK 11 million, and the Easter effect had a negative impact of SEK 16 million compared with 2015. The main reason for the drop in sales is the continued downturn in the envelope market, which resulted in both lower volumes and pricing pressures which had a negative impact on Bong's gross earnings.

Bong's total light packaging sales amounted to SEK 89 million (102). Currency fluctuations had a negative impact on light packaging sales of SEK 2 million compared with the corresponding period in 2015.

Despite lower sales, operating profit increased to SEK 11 million (-2), due to the new lower cost structure after the restructuring program.

Net financial items for the period, excluding non-recurring items, amounted to SEK -6 million (-14). Non-recurring items, related to the refinancing transaction, amounted to SEK 427 million (see further information below "Acquisition of the bank facilities"). Earnings before tax were SEK 432 million (-16) and reported earnings after tax were SEK 343 million (-20).

Acquisition of the bank facilities

Bong has completed the acquisition of its lending banks' claims. Bong announced in a press release on 29 January 2016 that the company had completed the acquisition of its lending bank's claims since all prerequisites for the deal were fulfilled. Below is a summary of the various steps in the transaction which significantly reduces and changes the nature of Bong's indebtedness and the effects thereof.

- Bong has acquired the Banks' claims on the Company against a cash consideration in the total amount of SEK 195 million. The Banks have also received a total of 27,272,727 shares in Bong through a set-off issue against part of the claims.
- The Banks transferred their earlier owned shares, approximately 23 million, to the investors of the bonds.
- The Banks were also entitled to subscribe for a total of 10 million shares in Bong through a directed issue at a subscription price of SEK 1.00 per share. The subscription could be made up until 28 April 2016.

Convertible bonds

- All convertible bonds in series 2013/2018 have been converted at a conversion price of SEK 2.75 per share, which provides the convertible bondholders with a total of 27,272,727 shares in Bong.
- The convertible bond holders were also entitled to subscribe for a total of 9,999,975 shares in Bong through a directed issue at a subscription price of SEK 1.00 per share. The subscription could be made up until 28 April 2016.

Bond issue

- Senior secured bonds in an amount of SEK 200 million were issued by the Company on 21 December 2015. The bonds have a three year tenor and a fixed annual interest rate of 10.0 percentage points. Each bond has a nominal amount of SEK 250,000 and the bonds are intended to be listed on the regulated market of Nasdaq Stockholm (Corporate Bonds List) within six months from issuance. Bong has undertaken not to declare any dividends during the life of the bonds.
- In accordance with the terms and conditions for the bonds, the bond investors will now receive 50,000 subscription warrants and 28,935 shares in Bong per bond. In total, 40 million subscription warrants (with a tenor of three years, which each entitles to subscribe for one share in Bong at a subscription price of SEK 1.15 per share) have been issued.
- The proceeds from the bond issue have been used to purchase the Banks' claims.

Effects of the transactions

The completion of the Transaction has resulted in an increase of equity and a reduction of interest-bearing debt by approximately SEK 500 million, whereby a reasonable balance between indebtedness and operating profit has been achieved. An additional positive effect of the measures is that the interest costs are decreased with approximately SEK 10 million per year as a result of the lower debt burden. If the directed share issues are subscri

bed for in full and full subscription of shares through exercise of the issued subscription warrants is made, an amount of approximately SEK 70 million will be added to the equity of the Company.

The deferred tax asset has been decreased with SEK 85.0 million due to the acquisition of the banks claims.

Cash flow and investments

The cash flow after investing activities improved to SEK 7 million (4). An improved result and decreasing working capital had a positive impact on the cash flow while investments, primarily within light packaging, had the opposite impact amounting to SEK -11 million. Only minor divestments were made in the period. The goal for 2016 is to decrease the stock level further given that all the movements of production capacity and stock have been finalized during 2015 and the service level restored.

Financial position

Cash and cash equivalents at 31 March 2016 amounted to SEK 74 million (SEK 64 million at 31 December 2015, net of the escrow account amounting to SEK 180 million). The Group had unutilized credit facilities of SEK 12 million on the same date. Total available cash and cash equivalents thus amounted to SEK 86 million (92 million at 31 December 2015, net of the escrow account amounting to SEK 180 million). Consolidated equity at the end of March 2016 was SEK 737 million (SEK 317 million at 31 December 2015). Translation of the net asset value of foreign subsidiaries to Swedish krona and changes in the fair value of pension debt and derivative instruments decreased consolidated equity by SEK 18 million. The interest-bearing net loan debt decreased during the period by SEK 544 million to SEK 293 million (SEK 837 million at 31 December 2015).

Employees

The average number of employees during the period was 1,605 (1,844). The Group had 1,597 (1,840) employees at the end of March 2016. Bong has intensively worked on improving productivity and adjusting staff to meet current demand and the reduction is the result of the implemented restructuring measures.

Parent Company

The Parent Company's business extends to management of operating subsidiaries and certain Group management functions. Sales were SEK 0.2 million (0.2) and earnings before tax for the period were SEK 245 million (0.6). Non-recurring items, related to the refinancing transaction, amounted to SEK 229 million.

Events after the end of the period

No material events have occurred after the end of the period.

Risks and opportunities

Business risks for the Bong Group are primarily related to market development and various types of financial risks. For further information, please refer to Bong's annual report and website bong.com.

Accounting policies

This interim report has been prepared in accordance with IAS 34, Interim Financial Reporting, and the Swedish Annual Accounts Act. Application was consistent with the accounting principles outlined in the 2015 annual report and the interim report should be read along with those principles. Please refer to Bong's 2015 annual report for a specification of the new amendments, interpretations and standards that took effect 1 January 2016.
