

Interim Report

January-June
2016

” After the first half year Bong is on track, despite a fierce competition in the envelope market. The cash flow improved in the second quarter and strengthened Bong’s financial position further. The light packaging business, especially within retail, showed a solid growth during the second quarter according to plan. The uncertain political and financial situation in Europe makes it very difficult to predict the second half year but our goal is still to make profit on bottom line for 2016, says Bong’s CEO Stéphane Hamelin. ”

Market and industry

During the first half year of 2016, Bongs statistics shows that the European envelope market volume have decreased by approximately 8% compared to the same period previous year. Bongs assessment is that the decline in the market will continue in the same pace during the second half of 2016.

The restructuring process and consolidation of the industry will continue, but at a slower pace than the market decline. Large overcapacity will remain.

After a strong recovery during Q1, the direct marketing segment has been very weak during Q2 due to the political uncertainty in Europe. The transactional segment still decreases due to the digitalisation.

The light packaging market, where Bong is present, is still growing and is a large and fragmented market. Bong has invested in paper carrier bag machines and see large opportunities for these products within the retail segment due to the EU legislation that will ban usage of plastic bags in Europe within a few years. This ban has already been implemented in a number of European countries.

Sales and profit

January – June 2016

Consolidated sales for the period reached SEK 1,066 million (1,172). Exchange rate fluctuations had a negative impact on sales of SEK -26 million compared with 2015. The main reason for the drop in sales is the continued downturn in the envelope market, which resulted in both lower volumes and pricing pressures which had a negative impact on Bong's gross earnings.

Despite lower sales, operating profit increased to SEK 4 million (-9), due to the new lower cost structure after the restructuring programs.

Net financial items for the period, excluding non-recurring items, amounted to SEK -19 million (-27). Non-recurring items, related to the refinancing transaction, amounted to SEK 430 million.

Earnings before tax were SEK 415 million (-35) and reported earnings after tax were SEK 323 million (-39).

Bong's total light packaging sales amounted to SEK 180 million (188). Currency fluctuations had a negative impact on light packaging sales of SEK -4 million compared with the corresponding period in 2015.

Sales and profit

April – June 2016

Consolidated sales for the second quarter reached SEK 500 million (533). Exchange rate fluctuations had a negative impact on sales of SEK -14 million compared with 2015. The main reason for the drop in sales is the continued downturn in the envelope market, which resulted in both lower volumes and pricing pressures which had a negative impact on Bong's gross earnings.

The operating profit ended up at almost the same level as for 2015 SEK -8 (-6) since the lower sales was compensated by cost reductions.

Net financial items for the period, excluding non-recurring items, amounted to SEK -10 million (-14).

Earnings before tax were SEK -18 million (-20) and reported earnings after tax were SEK -20 million (-19).

Bong's total light packaging sales amounted to SEK 92 million (86). Currency fluctuations had a negative impact on light packaging sales of SEK -3 million compared with the corresponding period in 2015.

Cash flow and investments

The cash flow after investing activities improved to SEK 27 million (-54). An improved result and decreased working capital had a positive impact while investments, primarily in machines for production of paper carrier bags, had a negative impact amounting to SEK -13 million (-11). Only minor asset sales of SEK 2 million (57) were made in the period. Restructuring programs had negative impact of SEK -19 million (-35). No non-recurring items has affected the liquidity in the period (-30).

Furthermore, the final payment for acquiring the former banks claims had a negative effect on the cash flow in the second quarter with SEK -15 million.

The Group had unutilized credit facilities of SEK 7 million on the same date. Total available cash and cash equivalents thus amounted to SEK 92 million (92 million at 31 December 2015, net of the escrow account amounting to SEK 180 million). Consolidated equity at the end of June 2016 was SEK 719 million (SEK 317 million at 31 December 2015). Translation of the net asset value of foreign subsidiaries to Swedish krona and changes in the fair value of pension debt and derivative instruments decreased consolidated equity by SEK -15 million. The interest bearing net loan debt decreased during the period by SEK -537 million to SEK 300 million (SEK 837 million at 31 December 2015).

The average number of employees during the period was 1,589 (1,817). The Group had 1,556 (1,751) employees at the end of June 2016. Bong has intensively worked on improving productivity and adjusting staff to meet current demand and the reduction is the result of the implemented restructuring measures.
